

APS Speech Messages

Speech messages shall be provided in the following format:

- "Wait."
- "Wait to cross _____ (A) _____ at _____ (B) _____."
- "Walk sign is on to cross _____ (A) _____."

The following table lists the entries for (A) and (B) above:

Street (A)	Street (B)	Arrow Direction	QTY
Fourth	Center	L	1
Fourth	Center	R	1
Center	Fourth	L	2
Center	Fourth	R	2
Highway Nine – Eleven	Puyallup (Pyew-al-up)	L	2
Highway Nine – Eleven	Puyallup (Pyew-al-up)	R	2
Puyallup (Pyew-al-up)	Highway Nine – Eleven	L	2
Puyallup (Pyew-al-up)	Highway Nine – Eleven	R	2
Highway One	Meridian	L	1
Highway One	Meridian	R	1
Meridian	Highway One	L	2
Meridian	Highway One	R	2
Twenty-third Avenue	One-hundred and eleventh Street	L	2
Twenty-third Avenue	One-hundred and eleventh Street	R	2
One-hundred and eleventh Street	Twenty-third Avenue	L	2
One-hundred and eleventh Street	Twenty-third Avenue	R	2
Two-hundred fifty-sixth	Eastbound Interstate One-oh-four ramp	L	1
Two-hundred fifty-sixth	Eastbound Interstate One-oh-four ramp	R	1
Eastbound Interstate One-oh-four ramp	Two-hundred fifty-sixth	L	2
Eastbound Interstate One-oh-four ramp	Two-hundred fifty-sixth	R	2

General Note

This table is a fill-in. The following is a basic guide for entering information:

- + Spell everything out (don't use numbers)
- + If a highway has a local street name, use the local street name.
- + Numbered streets and highways:
 - One-digit street numbers: third
 - One digit highway numbers: two
 - Two-digit numbers: forty-six(th)
 - Three-digit numbers: three sixty-four(th),
 - Three-digit highways with middle zero: highway nine-oh-four
- + Ramp terminal (leg) example:
 - highway three ninety-five southbound ramp
- + Use phonetic spelling for hard to pronounce names.
 - Ex: Tyee (tie-ee); Trospen (traw-spur)
- + Use L or R for arrow direction
- + Add rows for additional units

Example 1

- + Intersection of 4th Ave and Center St
- + Fourth Ave runs North-South
- + Center St runs East-West
- + Crosswalks on north, east, and west legs

Example 2

- + Intersection of Highway 911 and Puyallup Ave.
- + Crossings on all four legs

Example 3

- + Intersection of Highway 1 and Meridian St
- + Highway One runs east-west
- + Meridian St runs north-south
- + Crossings on north, south, and east legs

Example 4

- + Intersection of 23rd Ave and 111th St
- + Crossings on all four legs
- + Include the street type (street, avenue, drive, etc.) when both streets have the same name (e.g. Center St and Center Dr); This may also be used when both streets are numbers, to aid in location and orientation.

General Note

Note: blank rows may be used to break table up, but are not required.

Example 5

- + Eastbound I-104 ramp terminal at 256th St
- + Only one crossing of 256th St
- + Include direction (NB, SB, EB, WB) and word "ramp" to:
 - Differentiate between ramp terminals (NB vs. SB)
 - Avoid the perception that the crossing is across the mainline highway – particularly important for Interstates.
