

## What is scoping?

The purpose of scoping is to gather public comments on what issues should be considered and evaluated in the environmental impact statement for the Pontoon Construction Project.

We would especially like to hear from you on the following topics:

- Natural and built environmental issues that should be studied for the project.
- Ways to avoid, minimize or mitigate the environmental effects of the project.
- The project's purpose and need statement.

Community members write scoping comments at a WSDOT open house.
