Work on Lake Washington

Aerial photos of both floating bridges

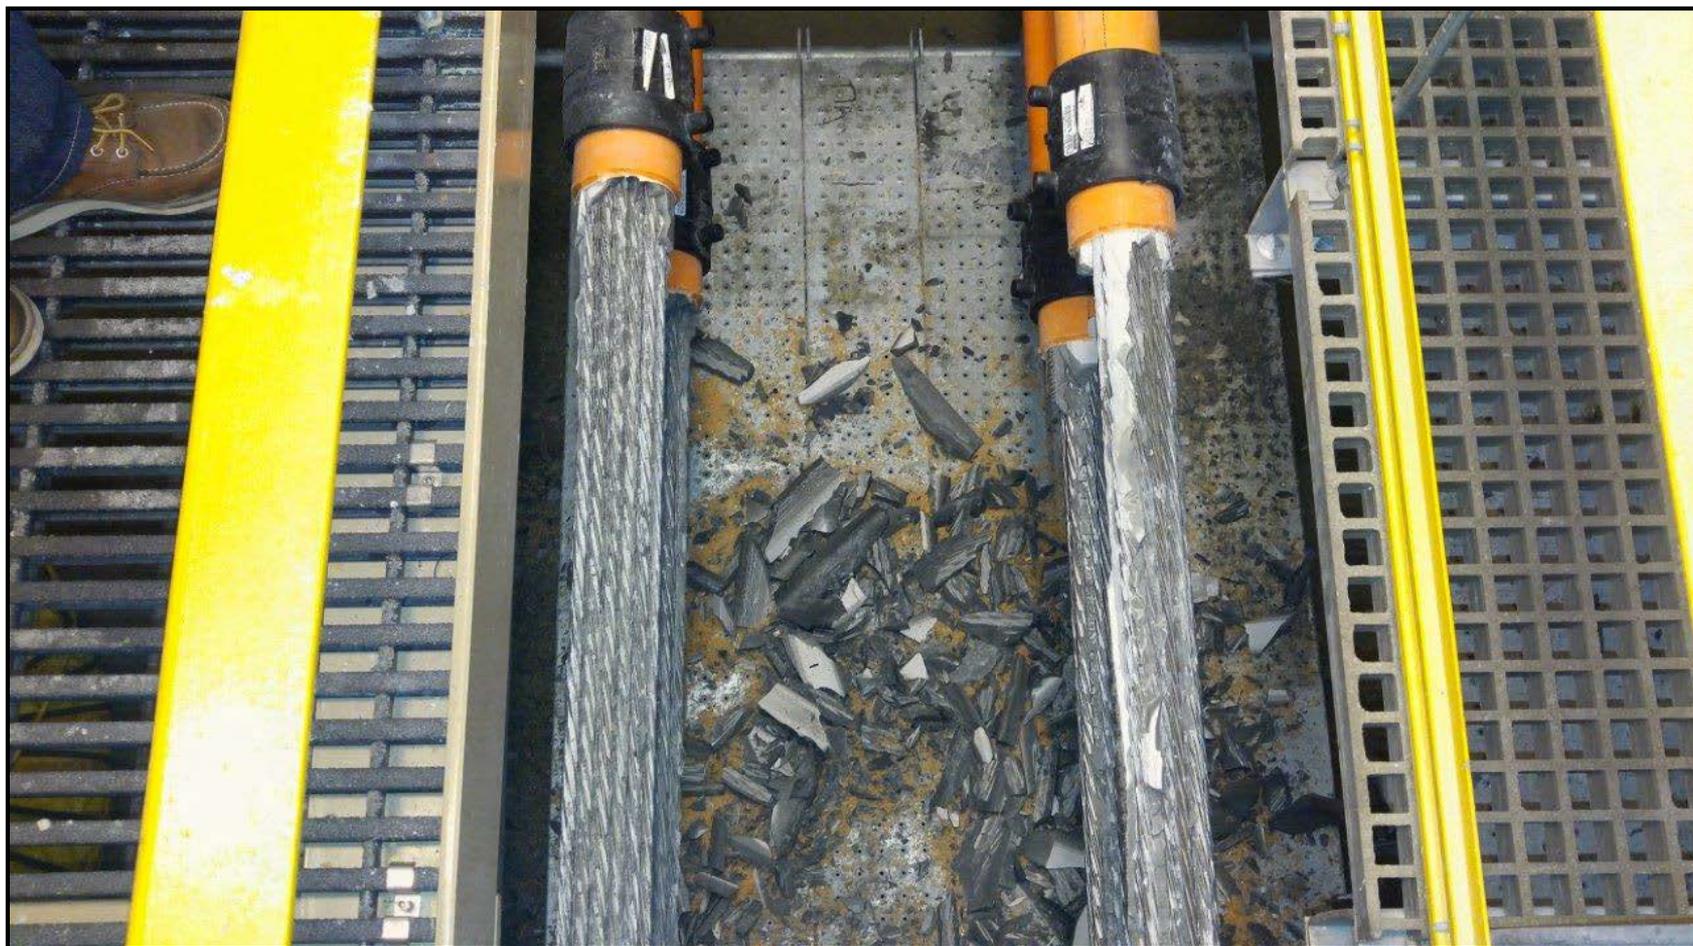

Steel truss removed between old floating bridge and east approach

Access openings to de-tension cables

Exposed post-tension strands in Pontoon F

Large opening cut on pontoon tops for access to remove post-tensioning cables

New bridge

Separation of pontoons A&B from C

New pontoon arrival; similar to old pontoon removal

Saw cutting girders on east approach

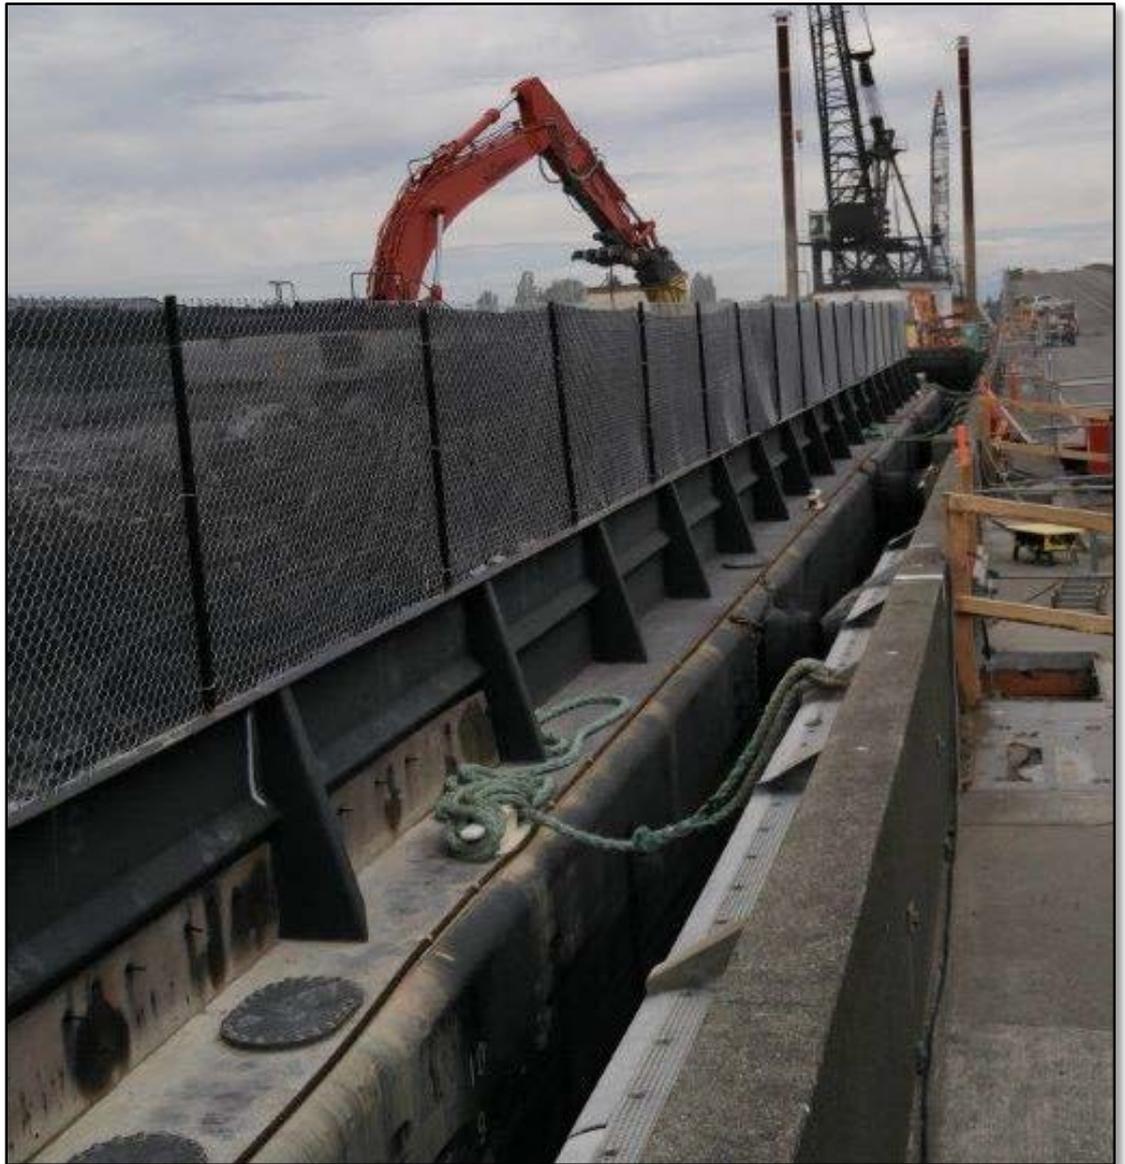

Removing "diaphragm" anchors that hold girders in place; controlling dust with water; barge parked below

Containment of material
on a work barge

Fencing on top of 4' barrier for materials containment

Work in Kenmore

Aerial of Kenmore work zone and adjacent Cal Portland facility

Assistant tug boat
