

Pontoon Construction Project

How and where will we store pontoons?

- Pontoons may be stored on-site at the new construction facility and in water until they are needed at the bridge site. The EIS will evaluate mooring the pontoons at Grays Harbor and on-site.
- The pontoons will be towed to the bridge site in Lake Washington as needed.

Towing tugboats at the CTC site in Tacoma.

Pontoons for the Hood Canal Project at the CTC site in Tacoma.
