

## Lake Washington Construction

Construction crews on Lake Washington use a crane-supported concrete bucket to apply grout for joining two supplemental pontoons together.

An aerial shot taken above Medina gives a unique view of what supplemental and longitudinal pontoons look like when joined together.

## SR 520 construction update: May 2014

### Pontoon towing

Pontoon MNW gets a seaplane escort across Lake Union on a beautiful, sunny Seattle morning.

It's a pontoon parade! Pontoons QNW and BNW keep each other company as they make their way through the Hiram M Chittenden locks.

### Weekend closure construction work

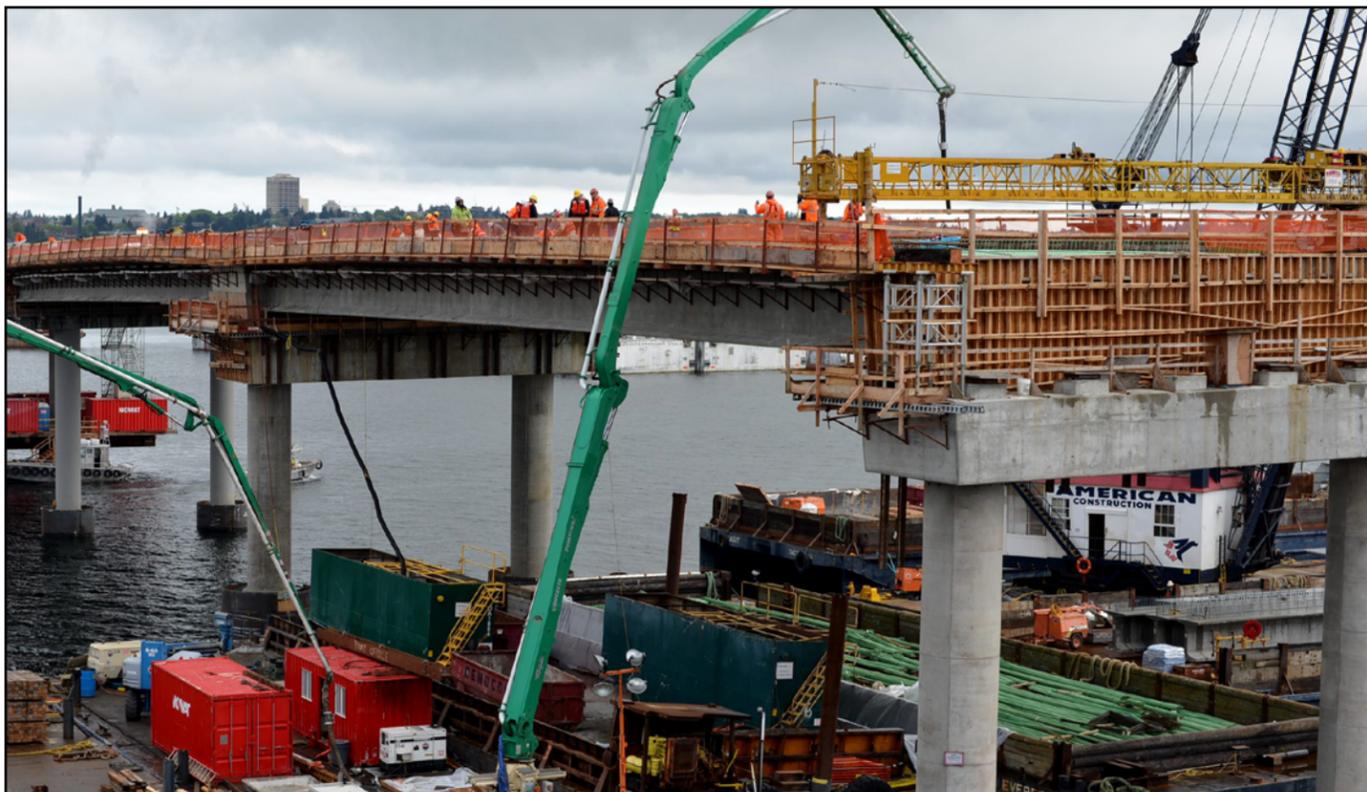

*During the May 30 – June 2 full weekend closure, crews placed about 10,000 tons of asphalt on the highway's westbound lanes between from I-405 and Medina.*

### Construction activities in Tacoma and Kenmore

*Crews in Tacoma pour concrete for the top deck of one of eight supplemental stability pontoons from the fifth of six cycles being built there.*

*Crews begin building the first section of roadway deck for the West Connection Bridge during the weekend of May 9 – 12.*

*In Kenmore, crews make steady progress as they work to construct 766 roadway deck sections for the low-rise portion of the new SR 520 floating bridge.*
