

What preliminary investigations have we completed so far?

We have conducted preliminary investigations to help us determine the suitability of this location for the project. We wanted to find out what we would encounter when developing this property. Our crews:

- determined potential for historic and cultural resources at the property.
- tested for environmental contaminants.
- identified wetlands and habitats.
- gathered soil and sediment samples.

Crews gathering core samples

The samples were carefully identified and then surveyed in the lab for potential evidence of historical and cultural resources
